How to Prepare for the Enrichment Program

- Ensure you have downloaded Zoom. It's free to use!
(www.zoom.us)
 - If you are new to Zoom, please test out the app before our session to ensure all is working and you know how to turn volume on and video on.
 - Secure your video device somewhere so that your Trainer can see the training area that you set up.
 - For a more stable and versatile set up, you can invest in a tripod/mount for your video device.
- If your dog is sensitive to hearing the trainer's voice coming from the video device, consider using ear buds/headphones.
- If you have other dogs in the house that will not be part of the video consult, try putting them away with a long-lasting chew (like a stuffed, frozen rubber toy or chew bone) to keep them occupied.
- Each Enrichment Program is different depending on the family and the individual dog. So having some treats, a chew, your dog's leash, a toy, a treat pouch with treats in it, etc. handy is helpful, in case we need any of it during our session(s).
